

VIEW Interface Program (VIP) Software

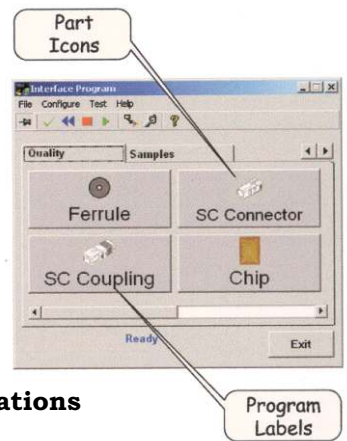

SWOP – 506

Description

For the production floor operator, VIP delivers built-in ease-of-use and minimizes learning curves while maximizing accuracy and productivity. Additionally, standard options allow the programmer to incorporate simple operator-friendly data handling and statistical process control (SPC) parameters directly into the run-time user interface.

Features

- Easy to use**
 VIP has user-definable program labels and part icons for single button operation of part measurement programs.
- Easy to set up**
 Single screen setup lets you define program links, choose icons, set text for buttons, and include information to send to the system.
- Manage many programs and configurations**
 The configuration menus control digital I/O, data saving, graphical outputs, and the dialog editor.
- Expandable**
 Expansion options include digital I/O, custom results control, serial port communications, network communications, third-party software control, and laser/turret setup and calibration.
- Security**
 Security features allow you to protect selected operations, prevent program manipulation, and block configuration changes.
